Committed to Caring for Your Eyes

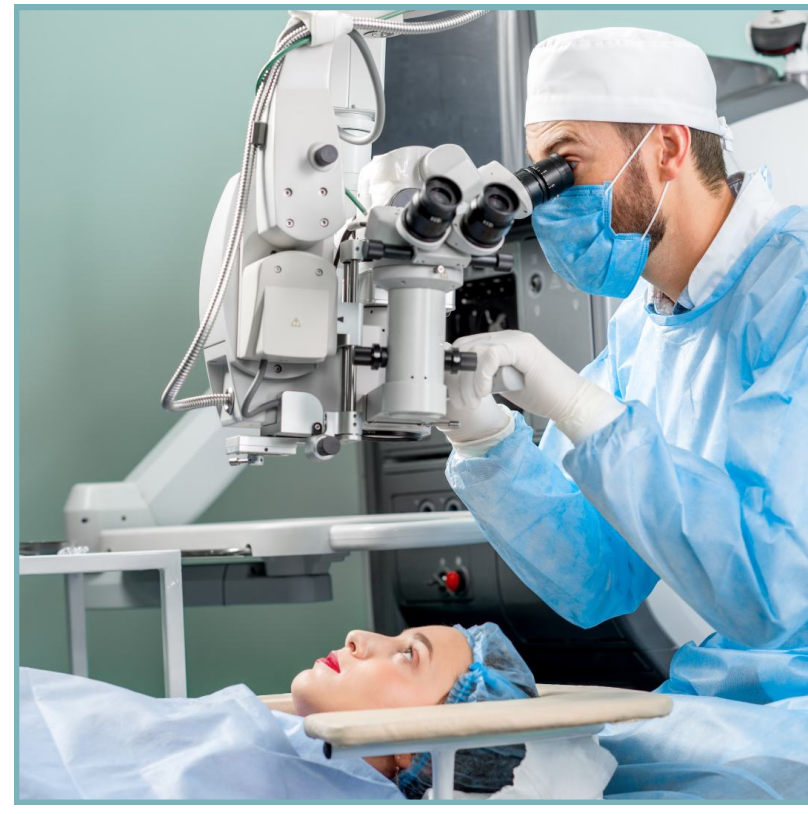

At Vista Clinic, we are dedicated to enhancing your vision and eye health with personalized care and advanced technology. Our team of skilled eye care professionals brings years of experience and a compassionate approach to each patient, ensuring you receive the highest standard of care. From comprehensive eye exams to specialized treatments and surgeries, we are committed to helping you achieve clear, healthy vision. Your eyes are our priority, and we strive to provide a comfortable and supportive environment for all your eye care needs.

OUR DOCTORS

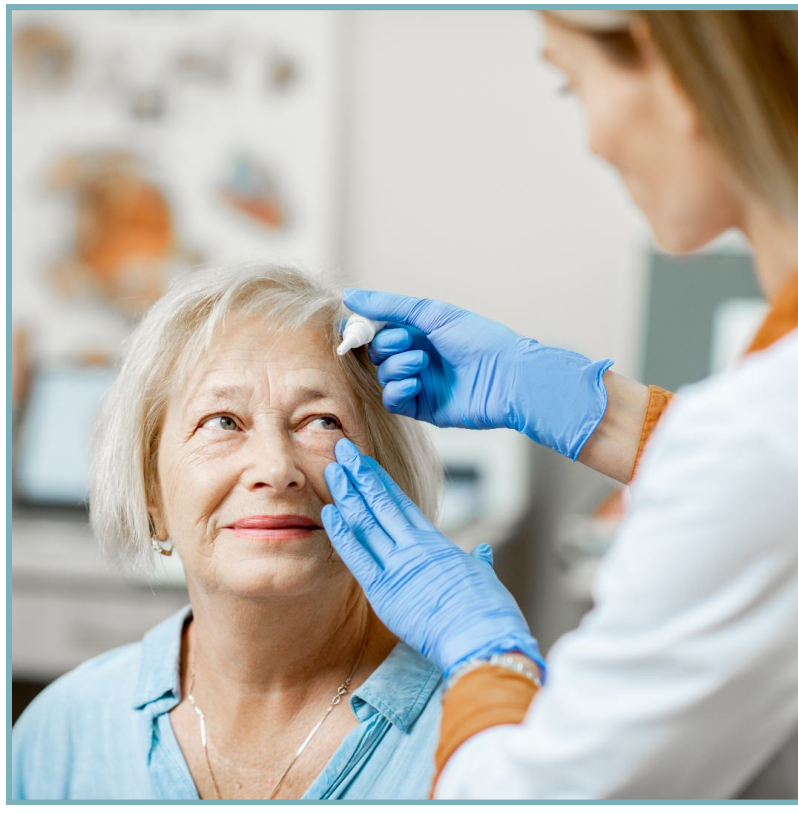

TREATMENTS FOR

[Check all our services](#)

Laser Eye Surgery (LASIK & PRK)

Regain clear vision with our advanced laser eye surgery options. LASIK and PRK are minimally invasive procedures designed to correct common vision problems, including nearsightedness, farsightedness, and astigmatism. These treatments reshape the cornea to help you see without relying on glasses or contacts, offering precise, lasting results.

Cataract Surgery

Experience life in vivid detail again with our cataract surgery. This quick, highly effective procedure removes clouded lenses caused by cataracts and replaces them with premium artificial lenses. Restore your vision, enhance color perception, and enjoy a renewed clarity that brings the world back into focus.

Retinal Injections (Anti-VEGF Therapy)

For patients affected by retinal issues such as macular degeneration or diabetic retinopathy, our anti-VEGF therapy can stabilize and often improve vision. These targeted injections prevent abnormal blood vessel growth, preserving and enhancing your sight and protecting against further retinal damage.

Dr. Laura Martinez

Ophthalmologist and LASIK Specialist

With over 15 years of experience in ophthalmology, Dr. Martinez specializes in refractive surgery, including LASIK and PRK. She completed her residency at the prestigious National Eye Institute and has advanced training in laser eye procedures. Her meticulous approach and compassionate care have helped hundreds of patients achieve clearer vision.

Dr. James Tanaka

Corneal Specialist

Dr. Tanaka, a renowned expert in corneal conditions, brings 12 years of experience to Vista Clinic. He trained at Tokyo Medical University and completed his fellowship in Corneal Surgery in the U.S. Dr. Tanaka's expertise in corneal transplants and keratoconus treatments makes him an asset for complex cases requiring specialized care.

Dr. Maria Sanchez

Pediatric Ophthalmologist

Specializing in pediatric ophthalmology, Dr. Sanchez has a decade of experience in diagnosing and treating eye disorders in children. She completed her training at the Children's Hospital and has a special interest in strabismus and amblyopia. Dr. Sanchez is known for her gentle, patient-centered approach, making her a trusted doctor for young patients and their families.
